WHO WE ARE

MG is the leading plate rolling machines manufacturer in Europe: a strong brand, first in technical innovation and customer service, with a global footprint.

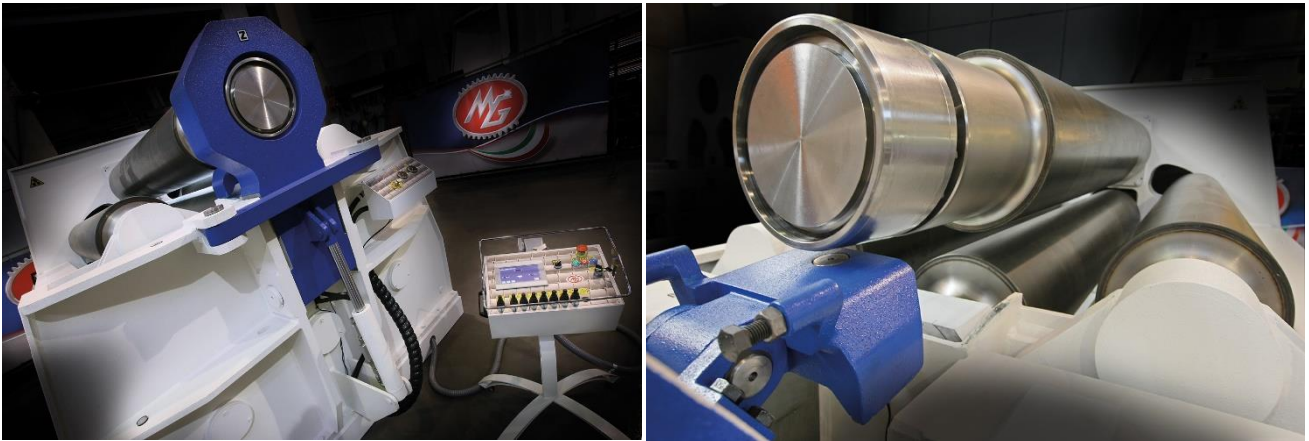

Every month we produce more than 35 machines, that are delivered to demanding customers in many different Industries: concrete mixers, mining equipment, heat exchangers, boilers, pipelines, drilling rigs, water treatment, chimney tubes, air compressors, wind towers, storage and fuel tanks, grain storage systems, water heaters, autoclaves, food beverage processing equipment, coolers, structural steel manufacturing, filters, nuclear reactors, pressure vessels.

MG knows any other application in the field of automotive, naval, railway and aero-spatial industry: our technical and sales experts always try to give our clients the best machine, system or service.

Today MG is able to meet any type of demand on plate rolling machines design and manufacturing: useful width from 200 mm **up to 8000 mm** and thickness from 0.5 **up to 300 mm (heavy-duty applications)**. We offer a complete choice of metal forming equipment: variable geometry plate bending rolls, 2-roll, 3-roll and 4-roll plate rolling machines, section bending technology, digital CNC systems with customized software, plate straightening machines, screw flight helix forming equipment, angle bending rolls, heavy duty machinery. MG can provide optional features and accessories: from polished and ground rolls to loading systems, from control units to safety devices.

The development of technically complex and tailor-made solutions is one of MG's core competencies. In order to find the right solution for every customer, we are an integrated service provider, from design to delivery of the ready-to-use product needed. Together with first class products, we offer customized services that guarantee the efficiency of our machines and systems: technical assistance and training; remote and on-site maintenance; supply of spare parts; machine upgrade and retrofitting.

MARKET POSITION and REFERENCES

MG started in the city of Fossano (Cuneo, Italy) in 1959 as a specialist in industrial automation. In 1981 we began the construction of plate bending machines, focusing our investments towards Quality and Innovation, and becoming the best manufacturer of hydraulic plate rolling machines. The original plant layout has been extended to the present, larger industrial area. Today we offer the most reliable machines, together with the best on site after sales service: the MG team is a truly global network.

Our customers are: Hyundai, Saipem, ENI, Zamil Steel, Caterpillar, Ingersoll Rand, Siemens, Alfa Laval Agri, Volvo, Basf, Ferrari, FCA, Nordex, Kons-Met, Kohimo, Fongs China, Gea gas & heat, Triten, American Asphalt, Larsen & Toubro, BHEL, Jindal Steel, Mazeikiu, China Nuclear, DKT, ... and many other global companies. They confirm and acknowledge the value of MG solutions and systems.

The MG Industrial Group TODAY

MG is a flexible and competitive organization focused on Quality and Innovation. We are oriented to results: every single branch of the Company acts locally, very close to customers and following our corporate strategy and shared goals.

MG headquarters are in Fossano (Cuneo), where are located the General and technical management, the International sales & marketing department, Finance administration, the R&D structure, Production and quality control.

The National sales management is located in Santa Maria Nuova (between Bologna and Cesena), for strategic reasons: it is a perfect location close to the most important Italian customers. Here we have a Technical department with R&D activities, and the National sales & marketing activities.

LONG TERM STRATEGY

MG is proud to offer first quality products with the best value for money. We design, produce and sell the most innovative technologies in the metal forming industry. Our strategy shows that quality, transparency and coherence lead to success. Every day we create **new solutions focused on customer needs, on a global scale: we work in 36 different Countries.** We are a "solutions partner" always able to add value to every MG customer. We accomplish this by providing consulting and application engineering services; producing a variety of state-of-the-art machinery, tools and CNC automation; keeping our customers informed of the latest technologies by offering seminars and workshop; as well as providing efficient, customer friendly after sale support and service.

OUR GLOBAL TEAM

MG believes in mutual support and in the power of teamwork: we are a team made with partners and distributors, customers and the MG people. Everybody is involved in the challenges that our Company faces every day.

We are committed towards providing a workplace that embraces diversity, inclusion and equal employment.

At MG we respect and value people. We believe that a strong team is made of different people with diverse views and capabilities. We want each employee of MG to experiment and seek opportunities: to achieve positive results through teamwork.

OUR CORE VALUES

Integrity – Respect – Collaboration – Teamwork – Excellence – Commitment to results.
A special enthusiasm that makes us proud to work together.
